2017 Special Orders for SunScreens™

To accommodate a greater range of screen needs, we offer larger screen sizes in an uncut format. We no longer offer volume discounts due to our increased cost for handling these special orders.

We cut from an 84-inch wide roll and each “sheet” is 32 inches.¹ The standard sheet dimensions are therefore approximately 32 inches by 84 inches. Each sheet has enough screen material for three SunWorks dryer screens. The screen pricing is based on \$24.95 per sheet.

When you order uncut sheets, we will keep up to five 32-inch sheets in one uncut roll. We still need to cut at least once every 5 sheets to making shipping manageable.

The shipping and handling for volume orders is a flat rate of \$24.00 that applies to all size orders, up to a maximum of 5 sheets per customer. This applies to US orders only. We ship via USPS or FedEx Ground/Home with delivery in 3 to 5 business days.

To place a special order: Send us an email indicating the quantity of uncut screen sheets (32-inch lengths) and the total price you calculate for the order, including shipping. We’ll send you a PayPal statement for the amount. Your order will be filled as soon as the statement is paid.

¹ Note that the 84-inch roll length from our supplier varies by up to ± 2 inches (82-86 inches) and we have no control over this.
